

PRINSTON SARFO ADU TUTU

Toronto, ON | prinston.adututu@georgebrown.ca | (942)588-2627

OBJECTIVE

AWS Certified Cloud Practitioner and Cloud Computing student at George Brown College with hands-on experience in systems administration labs, Linux environments, virtualization, networking fundamentals, and infrastructure automation. Skilled in Windows administration, troubleshooting, technical documentation, and cloud technologies. Seeking a Junior Systems Administrator Co-op opportunity where I can contribute to enterprise support operations, automation, and cloud infrastructure environments.

HIGHLIGHTS & QUALIFICATIONS

- Hands-on Windows administration experience aligned with MD-102 learning standards
- Experience working with Linux systems, virtualization, networking, and troubleshooting
- Knowledge of AWS cloud services including EC2, S3, IAM, VPC, and CloudWatch
- Experience with infrastructure automation using Vagrant and shell scripting
- Strong customer service, communication, and technical documentation skills
- Familiar with Active Directory, Azure AD concepts, Office 365, and PowerShell fundamentals

TECHNICAL SKILLS

- Systems Administration & Cloud: Windows Administration, Linux Administration, AWS (EC2, S3, IAM, VPC, CloudWatch), Active Directory & Azure AD Concepts, Office 365 Fundamentals
- Networking & Technical Support: Networking Fundamentals, LAN/WiFi, Client-Server Architecture, Endpoint Configuration, Troubleshooting, Technical Documentation
- Automation & Scripting: PowerShell Fundamentals, Shell Scripting, Infrastructure as Code (IaC), Vagrant
- Tools & Platforms: Git/GitHub, VMware, VirtualBox, Linux CLI, Jira, Nginx, Apache Tomcat, MySQL

EDUCATION & CERTIFICATION

George Brown Polytechnic

May 2026 – Apr 2027

Cloud Computing Technologies — Certificate Programme | Toronto, ON

- Configured and administered Windows 10/11 and **Windows Server** virtual machines, performing system administration tasks including user and group management, permissions, BitLocker, Storage Spaces, Group Policy, Hyper-V, Active Directory, and DNS.
- Administered **Microsoft 365** services through the Microsoft 365 Admin Center and PowerShell, including user management, licensing, Exchange Online, SharePoint Online, Microsoft Teams, and Windows 365.
- Performed Linux command-line administration, file management, system diagnostics, and troubleshooting in virtualized lab environments.
- Configured and tested network connectivity, IP addressing, subnetting, switching, routing, and end-device communication using Cisco Packet Tracer and virtual lab environments.

University of Ghana

Aug 2018 – Sep 2022

Bachelor of Arts — Economics & Philosophy | Accra, Ghana

AWS Certified Cloud Practitioner

Oct 2025

Amazon Web Services (AWS)

AWS re/Start Programme

Jan 2025 – Mar 2025

Amalitech | Accra, Ghana

PROFESSIONAL EXPERIENCE

Backend & Business Development Officer

Jan 2024 – Dec 2024

PRINSTON SARFO ADU TUTU

Toronto, ON | prinston.adututu@georgebrown.ca | (942)588-2627

PROFESSIONAL EXPERIENCE

Backend & Business Development Officer

Jan 2024 – Dec 2024

Manages Homes (Cycas Labs) | Accra, Ghana

- Built and tested RESTful backend APIs using Node.js and SQL, supporting core platform functionality
- Researched and evaluated scalable cloud deployment approaches to inform infrastructure decisions
- Conducted performance and cost-benefit analysis for proposed technical solutions
- Produced technical documentation and collaborated effectively with cross-functional remote teams

Business Development / IT Support

Nov 2022 – Dec 2023

Ghana Interbank Payment and Settlement Systems (GHIPSS) | Accra, Ghana

- Onboarded merchants and users onto digital payment platforms, guiding them through account setup and portal usage
- Supported rollout and adoption of the GHQR digital payment solution across merchant segments
- Responded to customer inquiries, diagnosed technical issues, and escalated when necessary
- Monitored transaction-related systems and collaborated with internal teams to maintain smooth platform operations

PERSONAL TECHNICAL PROJECTS

Automated Multi-Tier Java Web Application Deployment (Infrastructure as Code)

Apr 2026

- Designed and deployed a distributed multi-tier Java web application across multiple Linux virtual machines using Infrastructure as Code principles
- Automated full environment provisioning with Vagrant and shell scripting, enabling reproducible one-command deployments
- Configured Nginx as reverse proxy/load balancer and Apache Tomcat as the Java application server
- Deployed MySQL as backend database; integrated Memcached for caching and RabbitMQ for asynchronous communication
- Configured inter-service networking across VMs and validated end-to-end functionality via browser-based access through the Nginx entry point

Technologies: Vagrant · Shell Scripting · Linux (CentOS/Ubuntu) · Nginx · Apache Tomcat · MySQL · RabbitMQ · Memcached

ADDITIONAL INFORMATION

- Actively building hands-on cloud and DevOps skills through self-directed infrastructure projects using Linux, Vagrant, virtualization, and AWS.
- Developed practical experience with Windows Server, Microsoft 365 Administration, Active Directory, PowerShell, and enterprise networking through hands-on lab environments.
- Experienced using VMware, VirtualBox, and Cisco Packet Tracer to design, deploy, and troubleshoot virtualized infrastructure and network environments.
- Committed to continuous learning through technical certifications, personal projects, and cloud technologies.
